Musanze- Northern Province

Dear Rector,

RE: Implementation of the recommendations of the follow-up assessment of INES

Reference is made to the letter N° 1150/12.00/2017 informing you of the decisions and recommendations of the follow-up assessment of your institution conducted 3rd to 5th May, 2017. Reference is also made to the verification exercise conducted on 20th June, 2017 by a team constituted by HEC to ascertain the extent to which your institution implemented the recommendations of the follow-up assessment referred to above.

The findings of the verification exercise herewith attached, commend INES for working hard to implement the recommendations of the follow-up assessment including: Employment of additional Academic and Technical staff for the affected programmes (Biomedical Laboratory Sciences, Civil Engineering and Food Biotechnology Option); procurement of additional reference and textbooks; and establishment of two separate laboratories (one for Medical Microbiology and another for Food Microbiology).

In this regard therefore, you are informed that the suspended Biomedical Laboratory Sciences programme, Civil Engineering programme and Food Biotechnology Option are re-opened. We urge INES to implement the remaining requirements as indicated in the verification report and sustain the standards that were based on to re-open the programmes. HEC will make regular assessments to ensure that this is complied with.

Sincerely,

Dr. Papias MUSAFIRI MALIMBA
Minister of Education
